

SAFETY - McCOTTER BLVD

80+

commercial trucks in under 4 hours - on video.

McCotter is a 2-lane residential street: no shoulders, driveways onto the pavement, a 4-lane alternate with no homes a minute away. In writing, the City has no traffic study, no safety analysis, no complaints - 1990 to today. It's a state road; the seat can't reroute it alone, but it can force NCDOT to answer.

Source: City of Havelock written FOIA response; candidate's timestamped video; NCDOT (SR-1824).

ENFORCE THE LAW THAT'S ON THE BOOKS

87

loud-noise calls in my records. 6 actions - all in the first period.

Zero noise citations across my three most recent records periods - about six months (Feb-Aug 2026). The plainly-audible ordinance needs no meter (Sec. 93.04(B)(7)); the exhaust law has no loophole (Sec. 20-128). The tools exist - they go unused.

Source: 5 public-records requests, Havelock PD, counted row-by-row; Havelock City Code.

WHERE THE MONEY GOES

\$287,415

city-manager exit package - behind a closed session.

Roughly ten times Havelock’s per-capita income of \$29,099. The same budget raised utility rates on residents to 'balance the budget.' My commitment: read the budget lines every cycle, out loud, and answer every constituent within two weeks.

Source: Havelock BOC minutes 10/20/2025; US Census QuickFacts.

A MANAGER'S PAY SHOULD FIT THE TOWN

\$185-230K

what the City is advertising for its next manager.

In a town where the average person earns \$29,099 and 1 in 7 live in poverty. We've paid top dollar for a decade and the pipes still burst. Set a fair base (~\$120k, four times per-capita) and tie the rest to independently audited results. If the city thrives, the manager thrives.
